SANTA VITTORIA®

ACQUA MINERALE

One of the purest waters available, Santa Vittoria Acqua Minerale is bottled at the source in the Dolomiti Mountains in Northern Italy. The light carbonation along with its purity and low sodium level make Santa Vittoria the perfect accompaniment to fine dining as it does not alter the flavour of cuisine. Santa Vittoria mineral water is extracted at a year round temperature of 8 degrees celcius and contains an extremely low sodium level of 0.6mg/L.

Traditional Green Range

The traditional Santa Vittoria green bottle range available in still and lightly carbonated.

Dolomiti Mountains
